# استعد للقاء

- أحضر معك كراسة 
- أحضر معك قلم رصاص وممحاة 

# محتوى اليوم

- مراجعة على ما تم دراسته 
- نشاط تفاعلي 
- نشر المشروع 
- اختبار 

# الاختبار

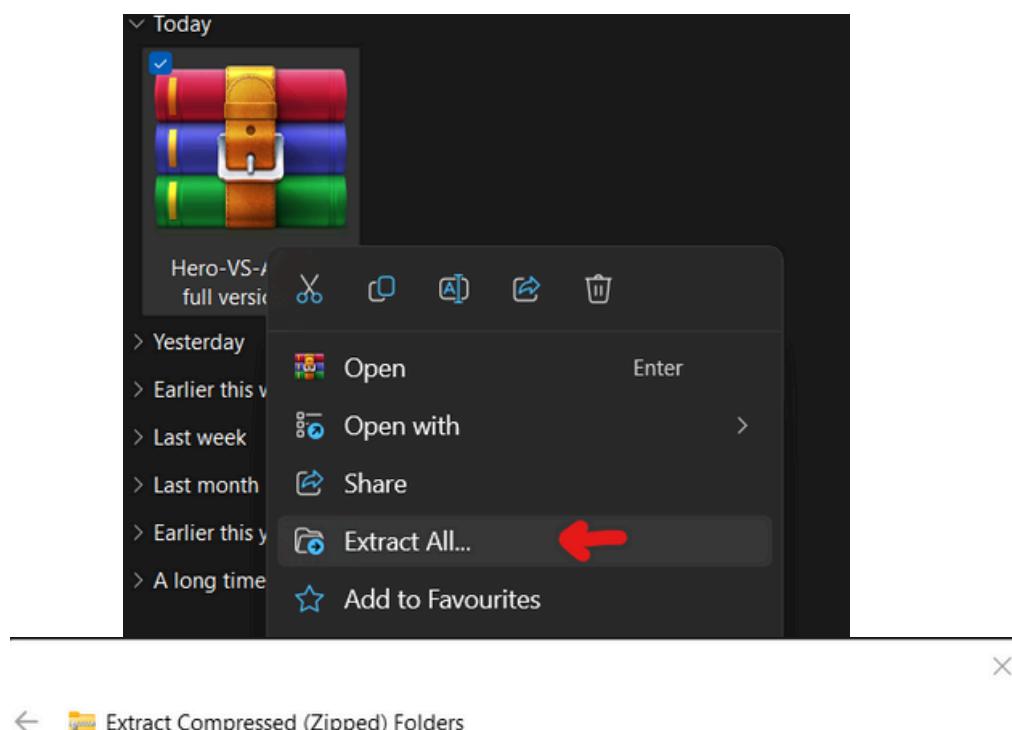

- الوقت المخصص: عشرون دقيقة
- عدد الأسئلة: خمسة عشر سؤالاً
- نوع الأسئلة: اختيار من متعدد

# How to export your game for HTML5

## Steps:

### 1. Download export templates

- Extract the project zip file

#### Select a Destination and Extract Files

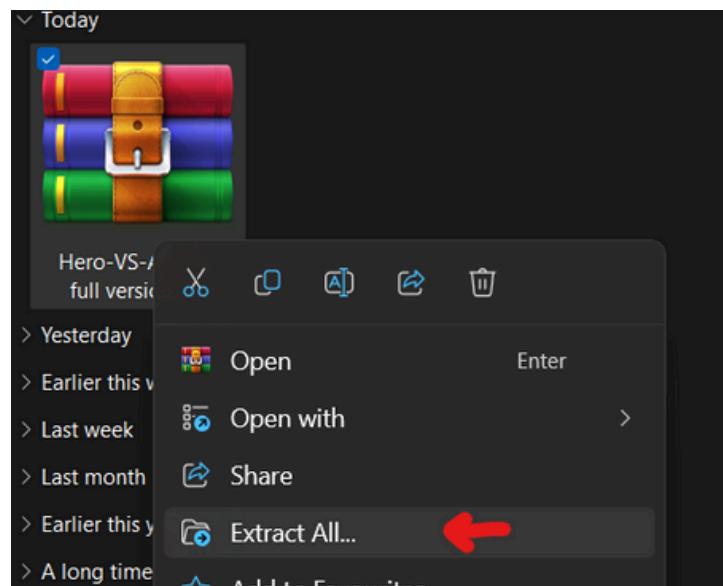

Files will be extracted to this folder:

C:\Users\APPLE\Downloads\Hero-VS-Aliens - full version

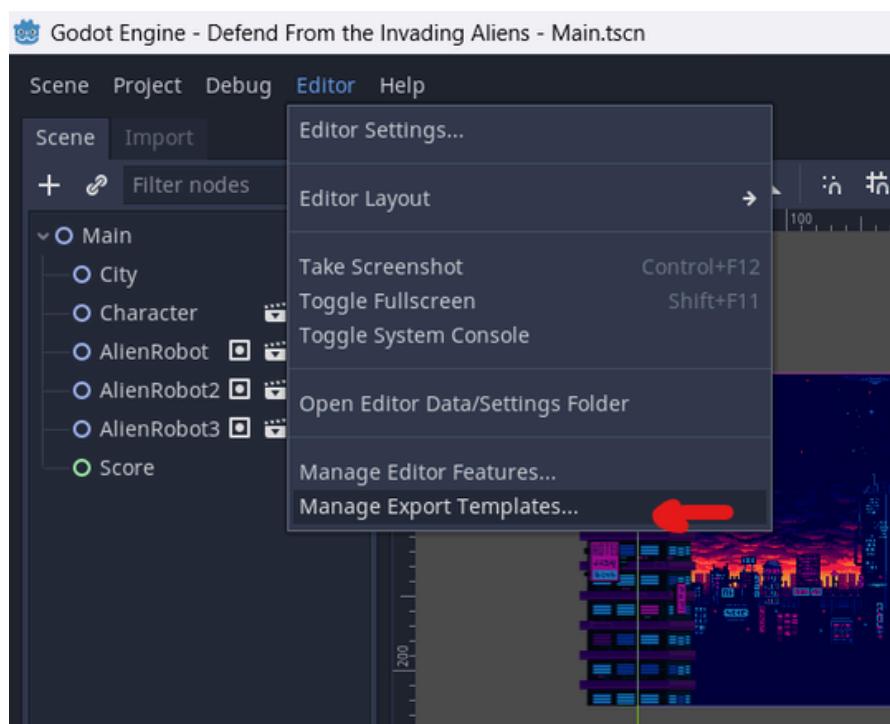

Show extracted files when complete

- From the extracted file open “project.godot” with Godot Engine

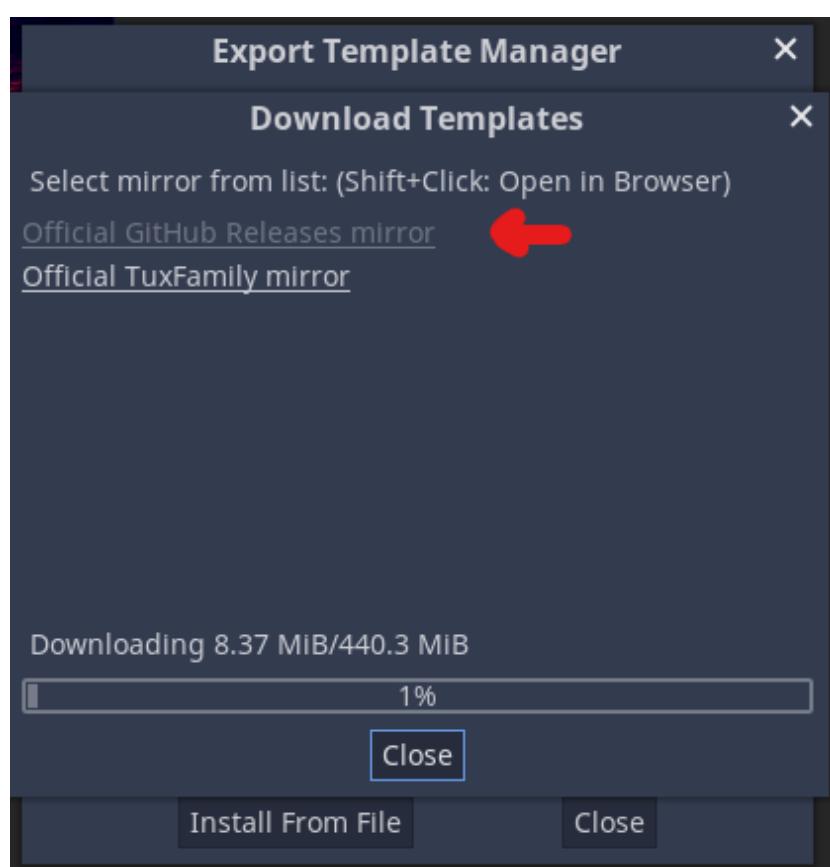

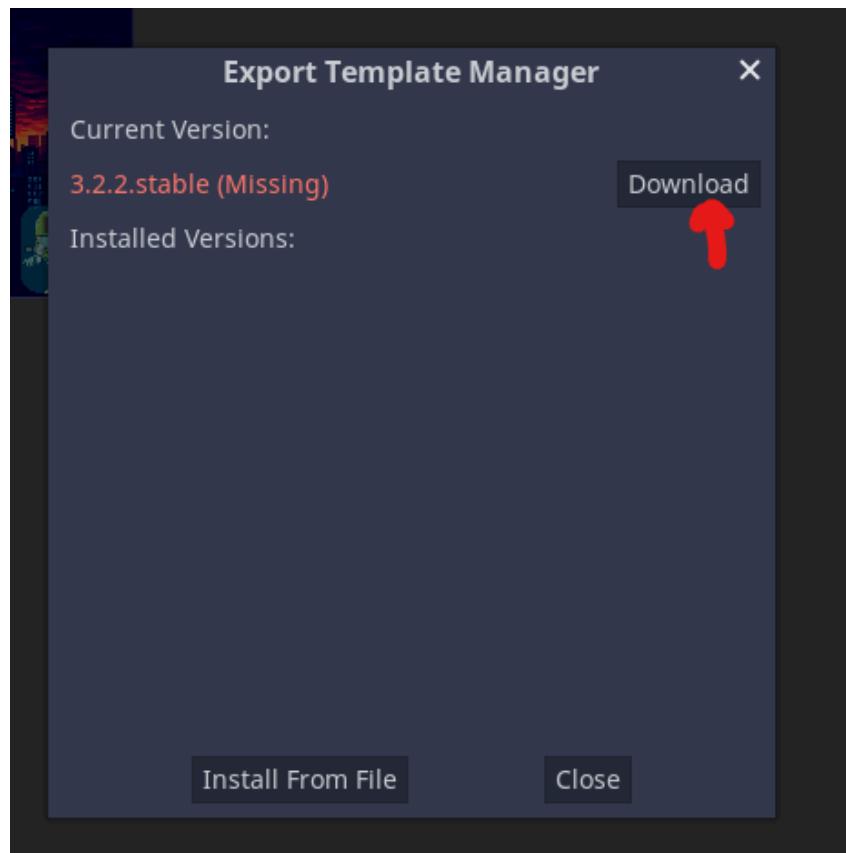

- From the editor menu choose “Manage Exported Templates”

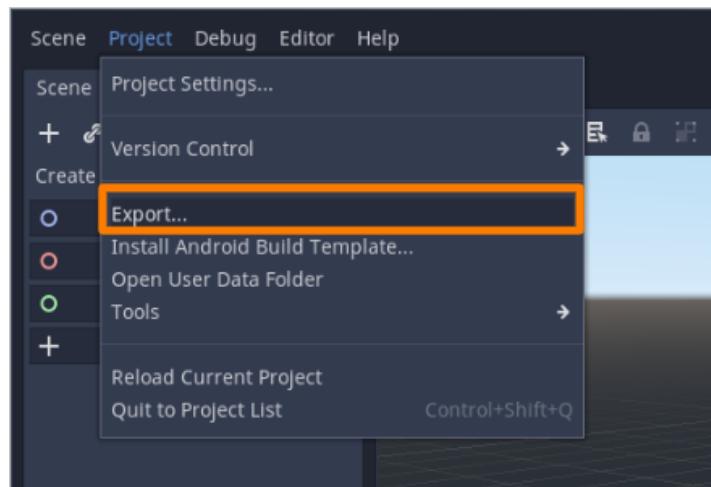

- Download the template.

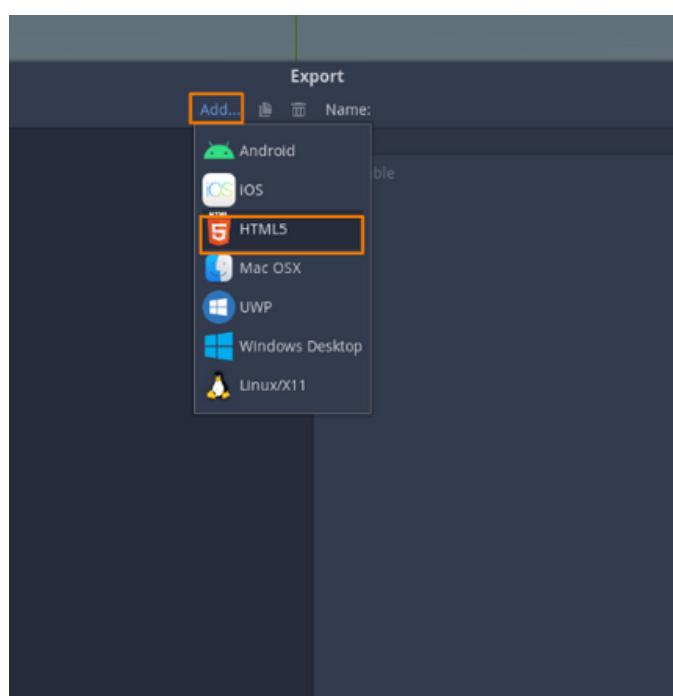

## 2. Build project for HTML5

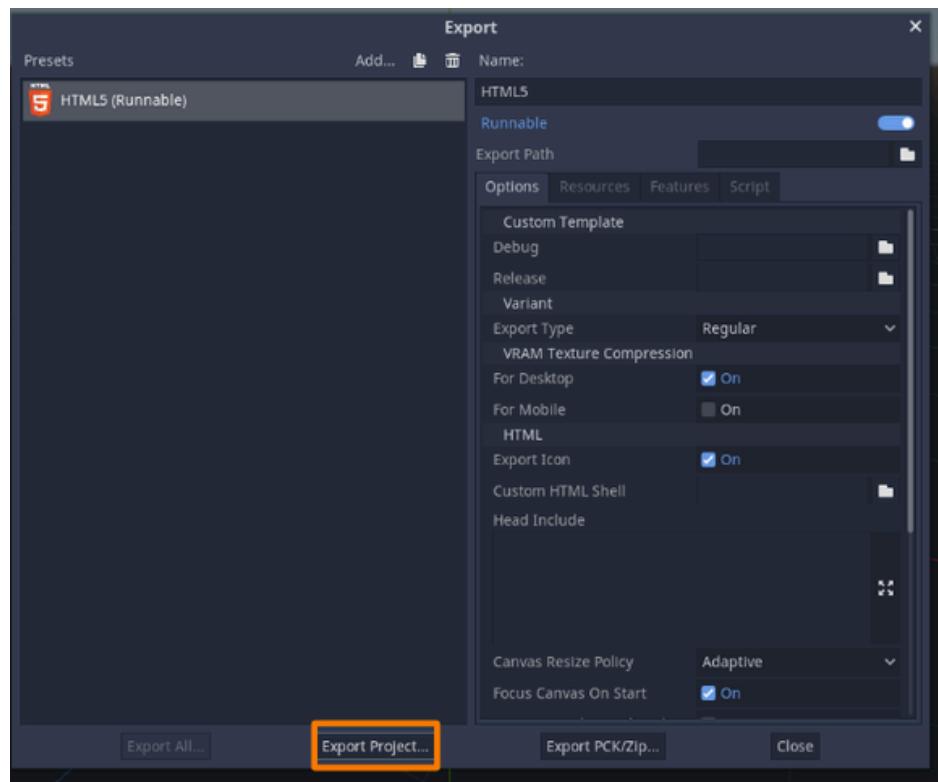

- Go to project → Export.

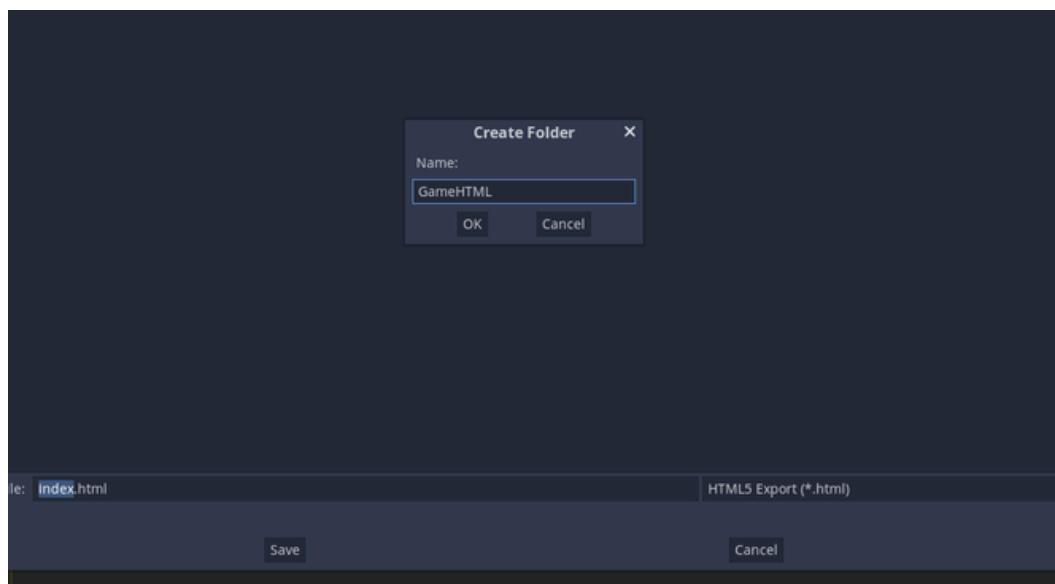

- Click Add and Select HTML5

- Leave the default configurations as it is fine, and click Export Project.

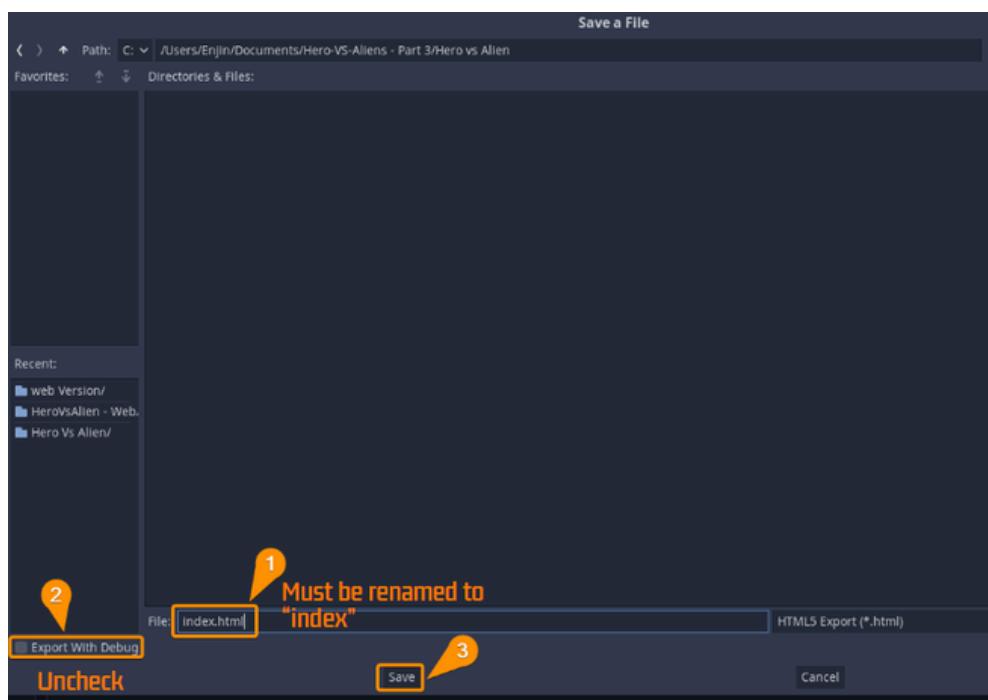

- Choose a path, create a new folder for the exported project files, and click Save.

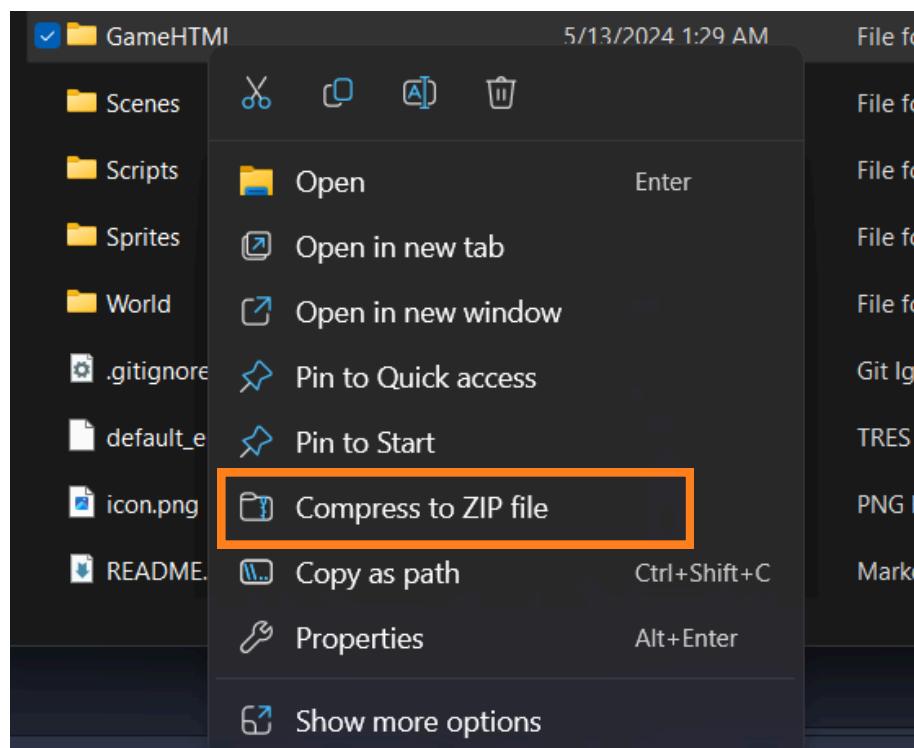

- Go to the project folder, and rename the .html file to “index”, and make sure to uncheck “Export With Debug”.

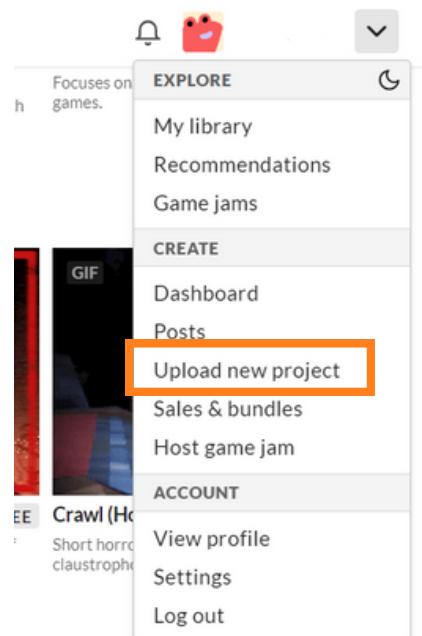

- Go back to the game folder  and Compress the project folder.

### 3. Publish on [itch.io](https://itch.io/)

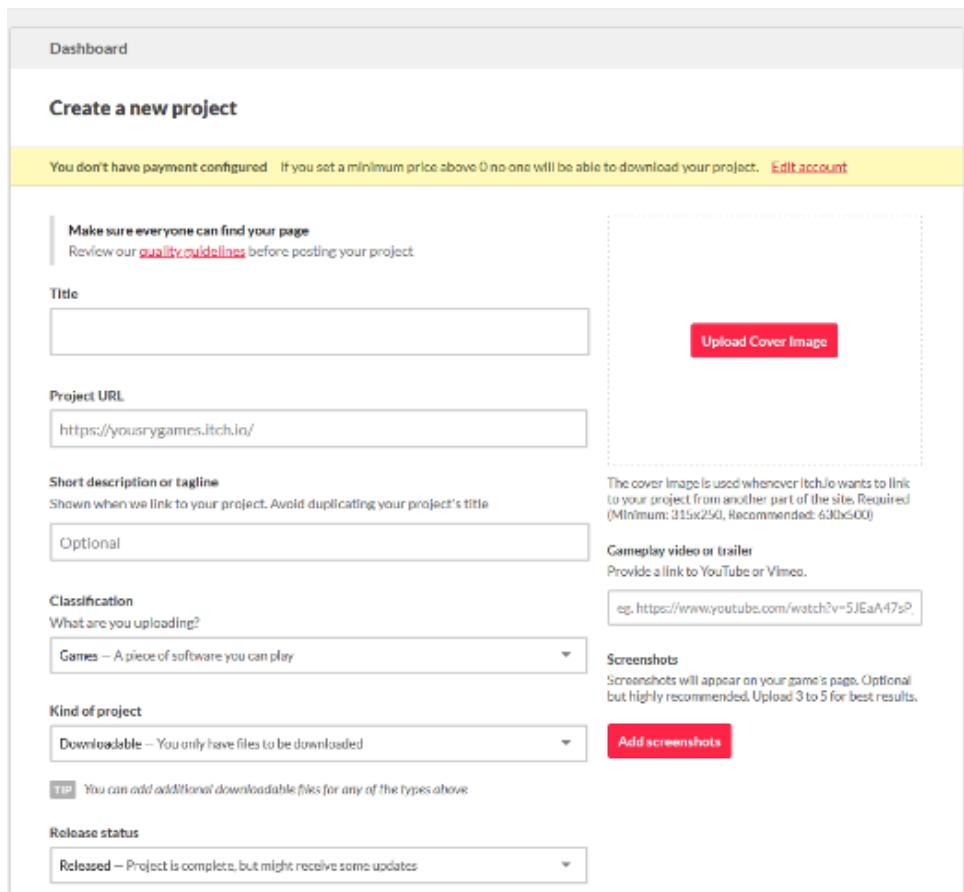

- Go to <https://itch.io/>
- Create an account by pressing [register](#).
- Fill in the [info](#) and the [email](#).
- After creating the account, go to your mail and [verify](#) the mail.
- [Login](#) to your account
- Click [Upload new project](#).

- On the new project page:

The screenshot shows the 'Create a new project' interface on itch.io. Key fields include:

- Title:** A text input field.
- Project URL:** A text input field containing <https://yourgames.itch.io/>.
- Short description or tagline:** A text input field labeled 'Optional'.
- Classification:** A dropdown menu set to 'Games — A piece of software you can play'.
- Kind of project:** A dropdown menu set to 'Downloadable — You only have files to be downloaded'.
- Release status:** A dropdown menu set to 'Released — Project is complete, but might receive some updates'.
- Upload Cover Image:** A red button.
- Gameplay video or trailer:** A text input field with an example URL: [eg. https://www.youtube.com/watch?v=5JEaA47sP](https://www.youtube.com/watch?v=5JEaA47sP).
- Screenshots:** A section with a 'Add screenshots' button.

- Fill in the basic info of the **title**, **short description**, and **details description**.
- Make the **classification** of the project as a **game**.
- Make the kind of project as **HTML**.
- Make the pricing as **no payments**.
- Upload a photo as the **cover image** for the game.
- Upload their **ZIP compressed file** of the game build folder and "select this file will be played" in the browser option

- Set the **Viewport dimensions** as the game window dimensions.
- Choose the following tags for the game: **2D, science-fiction, and single-player**.
- Choose the **shooter** genre.
- Save the game page then click **view page**.

#### Custom noun

You can change how itch.io refers to your project by providing a custom noun.  
Leave blank to default to: 'game'.

Optional

#### Community

Build a community for your project by letting people post to your page.

- Disabled  
 Comments – Add a nested comment thread to the bottom of the project page  
 Discussion board – Add a dedicated community page with categories, threads, replies & more

#### Visibility & access

Use Draft to review your page before making it public. [Learn more about access modes](#)

- Draft – Only those who can edit the project can view the page  
 Restricted – Only owners & authorized people can view the page  
 Public – Anyone can view the page

**Save** [View page](#)

- Check the game and make sure everything looks good.
- Click on the draft button above and select visibility as public.
- Copy the link to the game and share it with family and friends!
